PROFESSIONAL SUMMARY

Final-year B.Tech (CSE – AI & ML) student and entry-level **Full Stack Developer** who turns feature requirements into technical specs, database schemas and **RESTful APIs**, then ships working apps. Built and deployed 4+ projects with **React.js, Node.js, Express.js, PostgreSQL and Flask**, using **JWT authentication, role-based access control and MVC architecture**. Also skilled in **Docker, Git, data analytics** and **AI integration (Gemini API, MCP, Generative AI)**. Seeking internship and entry-level software roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C++, SQL, HTML5, CSS3

Frontend: React.js (Hooks, JSX), Tailwind CSS, Vite, EJS, Responsive Web Design

Backend & APIs: Node.js, Express.js, Flask, RESTful API Design, JWT Authentication, RBAC, MVC Architecture, Middleware

Databases: PostgreSQL, SQL, Database Schema Design, CRUD Operations, DuckDB, Pandas

AI / ML & Data: Generative AI, Machine Learning, Gemini API, Model Context Protocol (MCP), Chatbots, Computer Vision (CNN), XGBoost, Random Forest, SHAP, Data Analytics

DevOps & Tools: Git, GitHub, Docker, Docker Compose, Postman, pgAdmin, Vercel, Render, Neon, Cloudinary, VS Code

Software Design: Requirements Analysis, Technical Specification, Architecture Planning, ER/Schema Design, API Design, Debugging, Technical Documentation

CS Fundamentals: Data Structures & Algorithms (C++), OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

MediTrack – Medication Instructions & Reminder Management Live | Code

React.js, Vite, Tailwind CSS, Node.js, Express.js, PostgreSQL, JWT

- Analyzed requirements for three roles (user, doctor, admin) and **translated them into technical specs**: PostgreSQL schema, versioned **REST API** (/api/v1) and ownership-based permission rules
- **Architected** a layered backend (routes, controllers, models, middleware) with **JWT authentication, bcrypt hashing, RBAC** and a doctor verification workflow (pending, approved, rejected)
- Built private **CRUD** medication schedules; tested protected flows and cross-user access blocking with **Postman**; deployed on **Vercel, Render and Neon PostgreSQL** (React UI in progress)

YelpCamp – Campground Discovery & Reviews Platform | *Node.js, Express.js, PostgreSQL, EJS* Live | Code

- Developed a **full-stack** MVC application with listings, reviews, image uploads (**Cloudinary, Multer**) and map features (**MapTiler**); designed the relational **PostgreSQL** schema
- Managed environment configuration and deployed to **Vercel**; built a Python **MCP** server that lets an AI assistant search and retrieve campground data (Code)

Sales Analytics & Automated Data Cleaning Engine | *Python, Flask, Pandas, Plotly.js, Gemini API, MCP* Live | Code

- Built a 10-step **data-cleaning pipeline** for CSV/XLSX uploads (deduplication, date normalization, validation, derived sales values) with a before/after data-quality report
- Created an interactive **Plotly dashboard** (KPIs, city/category/product filters, search, CSV/Excel export) deployed on **Render**; added **AI-powered queries** over uploaded data with **Gemini API and MCP**

Task Manager – Full-Stack CRUD Application | *React.js, Node.js, Express.js, PostgreSQL* Live | Code

- Implemented **REST endpoints** for create, read, update, delete and integrated them with a React frontend on **Vercel**

Additional Projects

- **OmniAI** (team project): collaborated to integrate **XGBoost/Random Forest + SHAP** attrition prediction, a **CNN** image classifier and steganography into one Streamlit app
- **Flask + PostgreSQL + Docker**: containerized app with custom PostgreSQL 17 image, Docker network and persistent volume
- **Developer Portfolio**: animated, responsive site with 3D visual elements, deployed on **Vercel** (Live)

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering (AI & ML) 4th Year | Expected 2027

Institute of Technology and Management (ITM), GIDA, Gorakhpur | Dr. A.P.J. Abdul Kalam Technical University (AKTU)

CERTIFICATIONS

- **Generative AI, Deep Learning and Language Models** – EduSkills Foundation Verify
- **Full Stack Development** – EduSkills Foundation Verify
- **Full Stack JavaScript** – Udemy Verify | Backup copy

ACHIEVEMENTS & ACTIVITIES

- **Class Representative** (coordination and communication); college coding rounds; team project collaboration; chess player; self-driven, project-based learner of Docker, PostgreSQL, React and Generative AI
