Gorakhpur, Uttar Pradesh, India · +91 94528 41339 · shresthshukla1234@gmail.com

Final-year B.Tech student (AI & ML specialization) who learns by shipping: end-to-end full-stack apps across React/Node/Express/PostgreSQL, plus a data-analytics dashboard with AI integration. Comfortable across frontend, backend, databases & Docker; exploring Generative AI, Computer Vision & MCP.

TECHNICAL SKILLS

Proficiency — COMFORTABLE build & explain independently · LEARNING hands-on / strengthening

- **Frontend:** HTML, CSS, JavaScript, React.js, Vite COMFORTABLE · EJS LEARNING
- **Backend:** Node.js, Express.js, Flask, Python COMFORTABLE · REST APIs, CRUD COMFORTABLE
- **Languages:** JavaScript, Python, SQL COMFORTABLE · C++ (DSA) LEARNING · Hindi & English
- **Databases:** PostgreSQL, SQL COMFORTABLE · DuckDB, Pandas, CSV/XLSX LEARNING
- **Tools:** Git, GitHub, Docker, Vercel COMFORTABLE · Postman, Render, Cloudinary, pgAdmin LEARNING
- **Analytics:** data cleaning, KPIs, dashboards COMFORTABLE · Responsive design COMFORTABLE
- **AI / ML:** Generative AI, Machine Learning, CNN, XGBoost, Random Forest, SHAP LEARNING
- **GenAI / AI Apps:** Gemini API LEARNING, Model Context Protocol (MCP) LEARNING, chatbot integration LEARNING
- **Computer Vision:** image classification, preprocessing, augmentation LEARNING

PROJECTS

MediTrack — Medication Instruction & Tracking App

React · Node.js · Express · PostgreSQL · Docker · REST APIs

- Doctors publish medication instructions; users manage personal schedules, with doctor/user registration, authentication & admin approval.
- Structured backend (models, controllers, routes, middleware); DB relationships with ownership-based access control & role-based features.

Live · GitHub

YelpCamp — Campground Discovery & Review + MCP AI

Node.js · Express · EJS/EJS-Mate · PostgreSQL · Cloudinary · Multer · MapTiler · Git

- Listings, reviews, Cloudinary image uploads, map/location integration & env-variable-driven deployment.
- Extended with a **Yelpcamp MCP AI** component so an AI assistant can search/retrieve campground data via the Model Context Protocol.

Live · GitHub

Sales Analytics Dashboard — AI Data App

Python · Flask · Pandas · DuckDB · HTML/CSS/JS · Gemini API · MCP

- Upload CSV/Excel sales data, clean it (deduplication, column standardization, date/numeric validation) & compute KPIs & analytics.
- AI layer via Gemini API + MCP lets users query their own uploaded data conversationally.

Live · GitHub

Task Manager — Full-Stack CRUD Application

React · Node.js · Express · PostgreSQL

- End-to-end CRUD app connecting frontend & backend, building REST endpoints & database operations; foundation for the larger MediTrack build.

Live · GitHub

OmniAI — AI-Powered Intelligent App (team)

Python · Streamlit · XGBoost · Random Forest · SHAP · CNN · Computer Vision · Steganography

- Three engines: predictive (XGBoost/Random Forest + SHAP for explainable predictions), vision (custom CNN image classifier with regularization/early stopping), steganography (hide/reveal data in images).
- Unified Streamlit command center for file uploads, routing to the right module & result export.

GitHub profile

Other / Learning Projects

React fundamentals · Express/EJS labs · Flask + PostgreSQL + Docker · Personal 3D portfolio

- Containerized a Flask + PostgreSQL app with Docker (custom PG 17 image, custom network, persistent volumes, psycopg2 connectivity).
- Interactive personal developer portfolio with animations & 3D elements, deployed on Vercel.

Portfolio

CERTIFICATES · EDUCATION · ACHIEVEMENTS & OBJECTIVE

CERTIFICATES

- **Generative AI / Deep Learning / Language Models** — EduSkill Foundation verify
- **AI / ML Program** — EduSkill Foundation verify
- **Full Stack JavaScript** — Udemy cert (backup: kommodo.ai)

EDUCATION & OBJECTIVE

- **B.Tech — CSE (AI & ML)** — Institute of Technology & Management (ITM GIDA), Gorakhpur
- Affiliated with Dr. A.P.J. Abdul Kalam Technical University (AKTU), UP · Class of 2027

Open to internships & entry-level full-time roles in Full Stack / Software Development, Backend, or AI-powered application development — aiming to show what I've actually built, not just a list of technologies studied.

ACHIEVEMENTS & INTERESTS

- **Class Representative** — coordination & communication
- College coding rounds; team technical development (OmniAI)
- Chess (strategy & planning)
- Independent learning: Docker, PostgreSQL, React & Generative AI
